EXAMINATIONS COUNCIL OF ESWATINI
Eswatini General Certificate of Secondary Education

CANDIDATE NAME	

CENTRE NUMBER							CANDIDATE NUMBER					

GEOGRAPHY **6890/02**

Paper 2 Geographical Skills **October/November 2025**

2 hours

Candidates answer on the Question Paper.

Additional Materials: Ruler
Protractor
Plain paper
Calculator
1:50 000 survey map extract enclosed with this Question Paper

READ THESE INSTRUCTIONS FIRST

Write your name, centre number and candidate number in the spaces provided.
Write in dark blue or black pen.
You may use a soft pencil for any diagrams, graphs, calculations, tables or rough working.
Do **not** use staples, paper clips, highlighters, glue or correction fluid.

SECTION A
Answer **all** questions.

SECTION B
Answer **all** questions.

SECTION C
Answer **one** question.

The Insert contains Photograph A for Question 1(m), Photograph B for Question 2(a), Fig. 11 for Question 5(b), Fig. 16 for Question 5(d), Fig. 18 for Question 6(a) and Fig. 22 for Question 6(d).

The number of marks is given in brackets [ ] at the end of each question or part question.

For Examiner's Use	
Section A	
Question 1	
Section B	
Question 2	
Question 3	
Question 4	
Section C	
Either Question 5	
Or Question 6	
Total	

This document consists of **28** printed pages and **4** blank pages.

For Examiner's Use

SECTION A

Answer **all** questions in this section.

1 Study the map extract of Glendale, Zimbabwe on the scale of 1:50 000.
Fig. 1, shows the position of some features in the central part of the map extract.

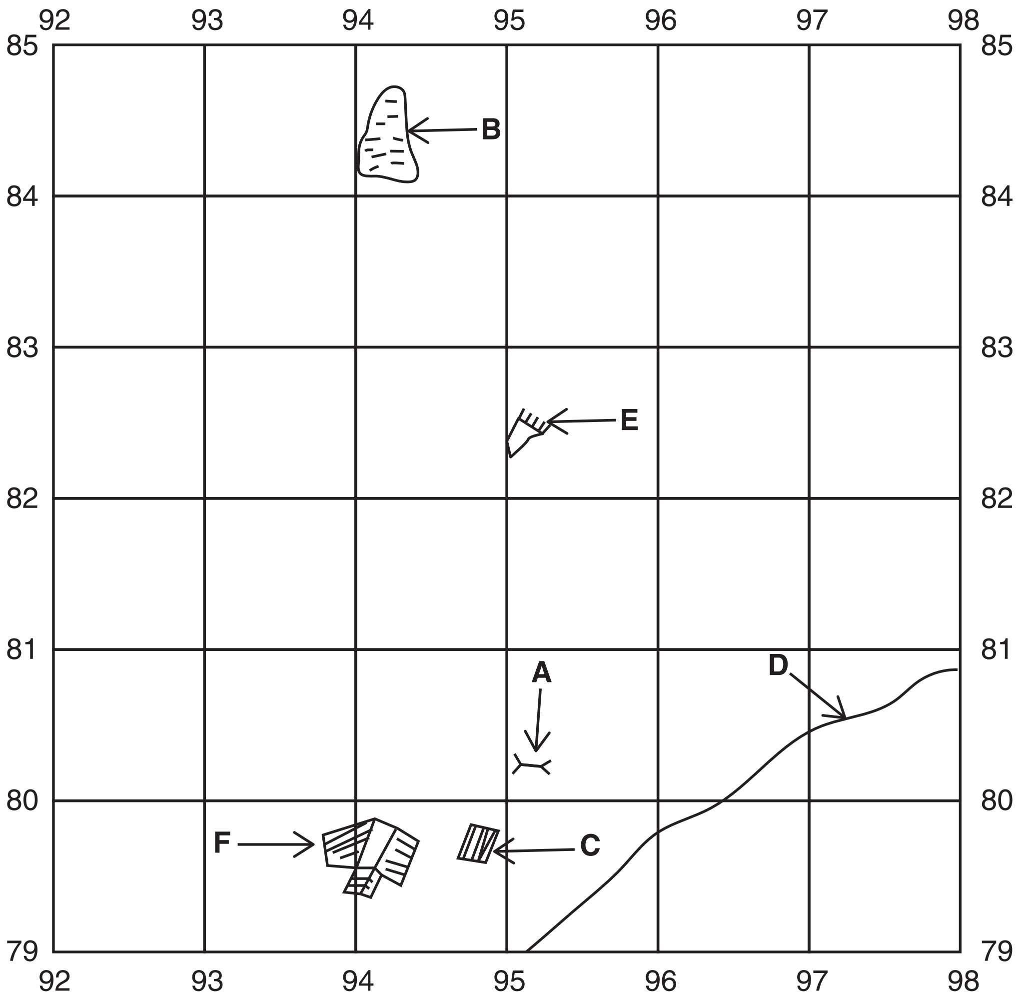

Fig. 1

(a) Identify the following features shown in Fig. 1:

(i) feature **A**;

.... [1]

(ii) land use at **B**;

.... [1]

(iii) feature **C**;

.... [1]

(iv) type of road **D**;

.... [1]

(v) river feature **E**;

.... [1]

(vi) land use at **F**.

.... [1]

(b) Name the feature that is located at grid reference 906748.

.... [1]

(c) Identify **two** recreational facilities found in the town of Glendale.

1 ....

2 .... [2]

(d) A tourist standing at the trigonometrical station (9874) on top of the mountain range can see the town of Glendale.

State the general compass direction the tourist is looking.

.... [1]

(e) Measure the whole circle bearing of the trigonometrical station at 9874 from the spot height at 9677.

....

.... [1]

(f) Measure the distance along the tarred road in **metres** from the spot height at grid square 9685 to the spot height at grid square 0089.

.... metres. [1]

(g) Calculate the average gradient of the narrow tarred road between the spot height at 9685 and the spot height at 0089.

....

....

....

.... [2]

For Examiner's Use

(h) Study Fig. 2, which shows an area on the map where there is a plantation or orchard.

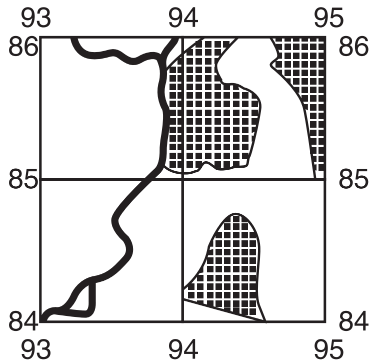

Fig. 2

Identify **two** features of that plantation farming in the area shown.

1 ....

2 .... [2]

(i) Identify the settlement pattern shown in grid square 9780.

.... [1]

(j) State **one** possible reason for the development of this pattern of settlement.

.... [1]

(k) Study Fig. 3, which shows part of Laurencedale Estate.

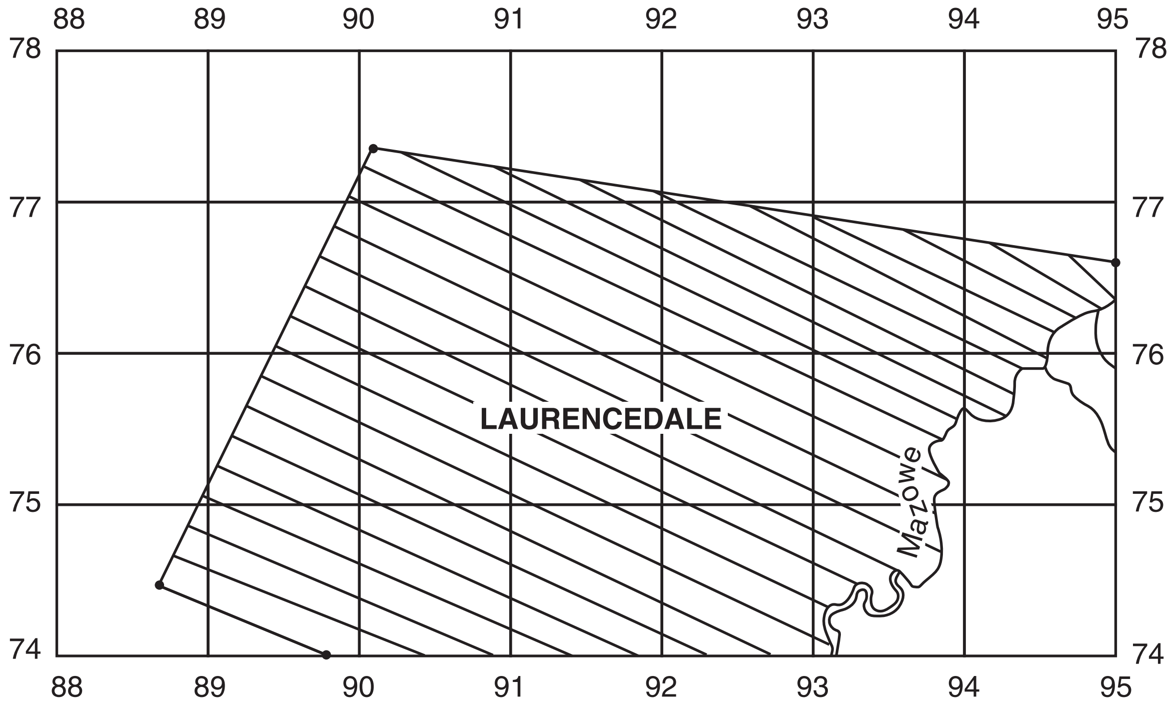

Fig. 3

Using Fig. 3, calculate the total area of the estate shown.

....

....

....

....

....

.... [3]

For Examiner's Use

(l) Fig. 4, shows a gravel road south of Virginia South Extension.

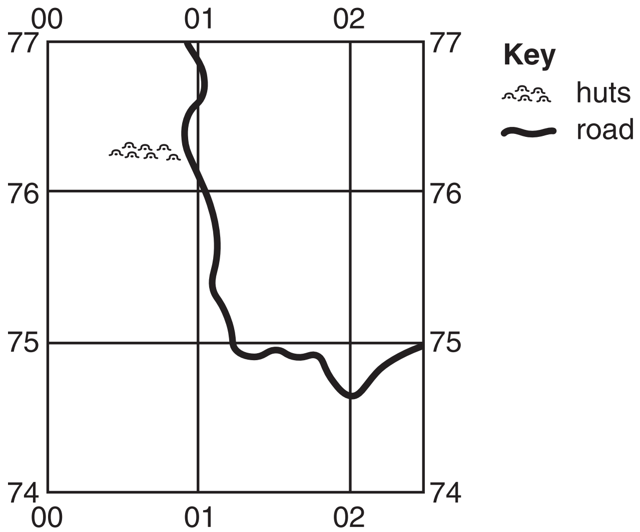

Fig. 4

Which **one** of the following physical features has made it possible for the road to be constructed. Tick (✓) the correct answer. [1]

Physical feature	**Tick (✓)**
Mountain pass	
Gorge	
Cliff	

(m) Study Fig. 5, which shows part of the map where aerial Photograph **A** (Insert) was taken. The map was produced in 1987, Photograph **A** was taken in 2022.

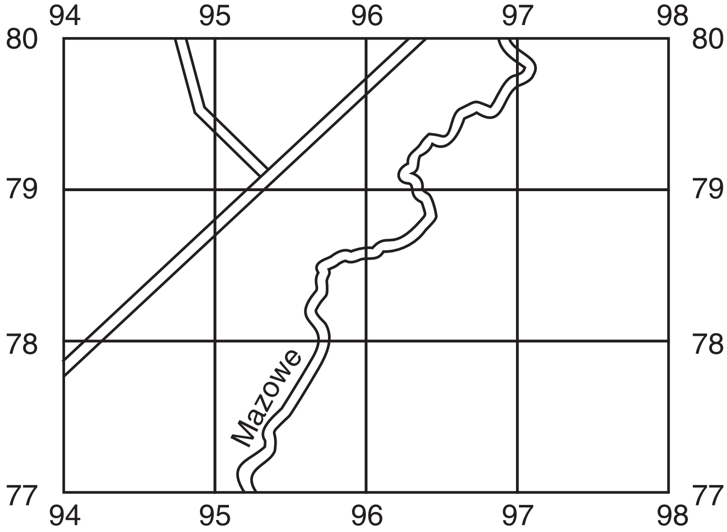

Fig. 5

Identify **three** changes that have taken place in this area between 1987 and 2022.

1 ....

2 ....

3 .... [3]

[Total: 25 marks]

SECTION B

Answer **all** questions in this section.

2 **(a)** Study Photograph **B** (Insert), which shows part of an automated digital weather station.

(i) Define a *digital weather station*.

....

.... [1]

(ii) State any **two** weather elements that are represented by the data displayed on the screen.

1 ....

2 .... [2]

(iii) Identify the parts labelled **A** and **B**.

A ....

B .... [2]

(b) Study Fig. 6, which shows a five-day weather forecast for an area.

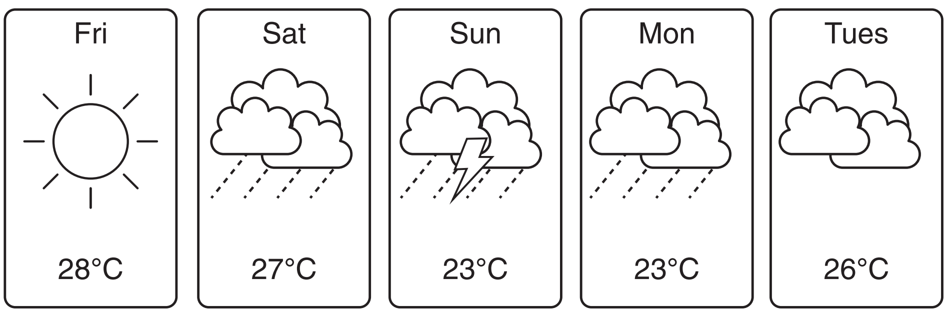

Fig. 6

(i) Describe the weather forecast for Sunday.

....

....

....

.... [2]

(ii) Study Fig. 7, which is a graph showing the changes in temperature over the same five day period.

Use Fig. 6 to complete Fig. 7 by plotting the predicted temperature for Tuesday. [1]

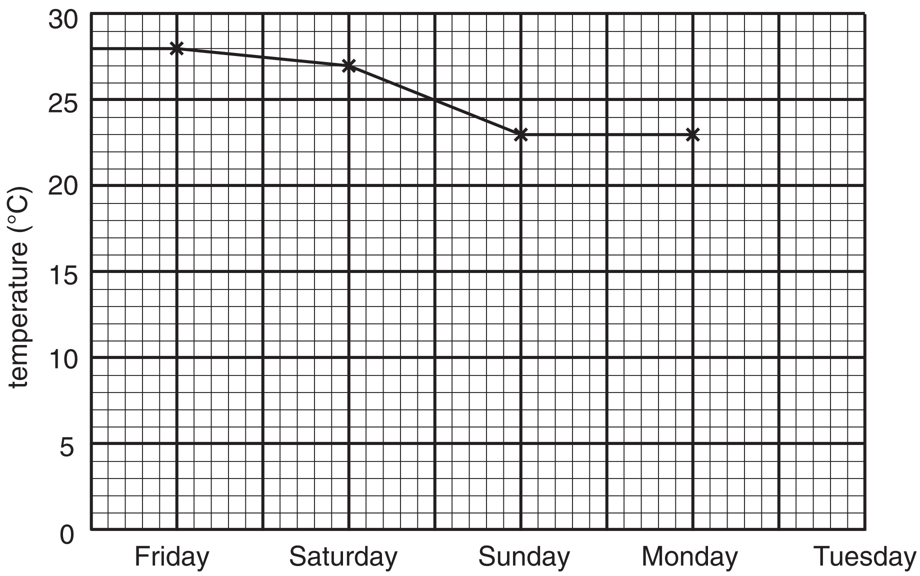

Fig. 7

[Total: 8 marks]

For Examiner's Use

3 **(a)** Study Fig. 8, which shows the distribution of water use in different countries.

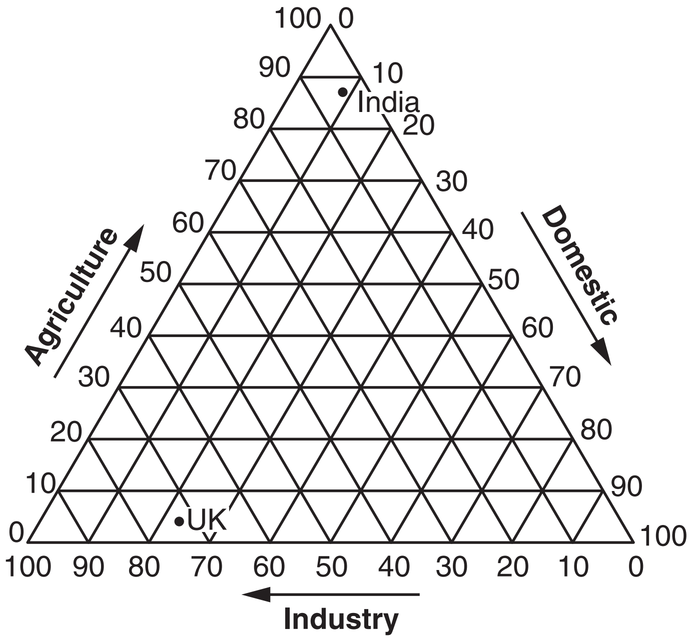

Fig. 8

(i) Use Table 1 to plot the information for Mali on Fig. 8. [1]

Table 1

Country	Agriculture (%)	Domestic (%)	Industry (%)
Mali	90	9	1

(ii) Describe the differences in water use between UK and India. Do **not** use data in your answer.

....

....

....

....

....

.... [3]

For Examiner's Use

(iii) Suggest **two** reasons why the use of water varies in different countries.

1 ....

....

2 ....

.... [2]

(b) State **two** uses of water in industries.

1 ....

....

2 ....

.... [2]

[Total: 8 marks]

4 **(a)** Study Fig. 9, which shows the relationship between the birth rates and the life expectancy at birth for some countries.

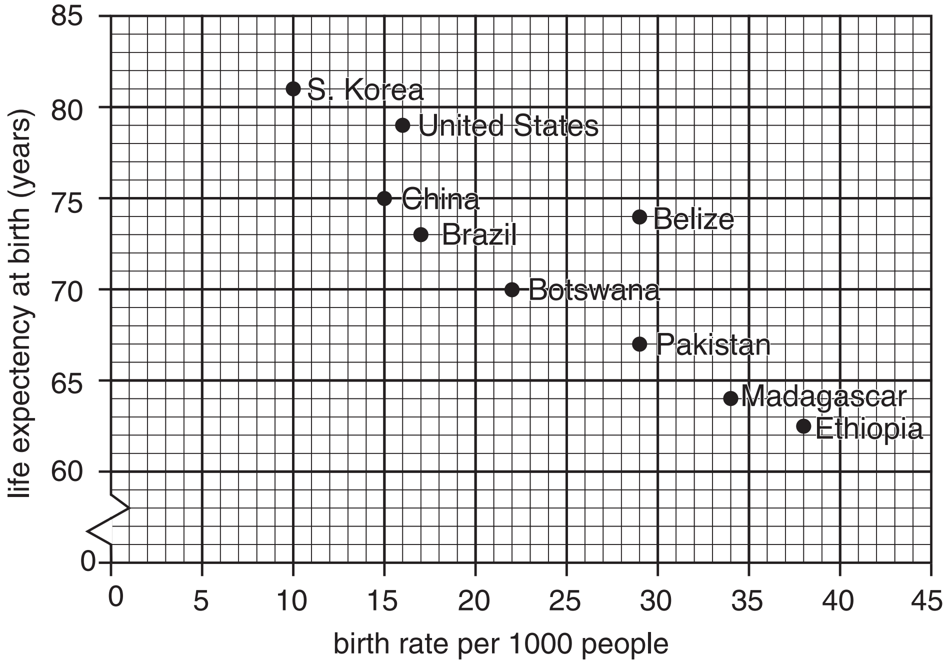

Fig. 9

(i) Define *life expectancy*.

....

.... [1]

(ii) Eswatini has a birth rate of 24 per 1000 and a life expectancy at birth of 61 years.

Plot this information on Fig. 9. [1]

(iii) What type of relationship between the birth rate and the life expectancy at birth is shown by Fig. 9?

.... [1]

(iv) Suggest **three** reasons why the life expectancy at birth is low in LEDCs.

1 ....

....

2 ....

....

3 ....

.... [3]

(b) Study Fig. 10, which shows the changes in China's birth rate between 1979 and 2020.

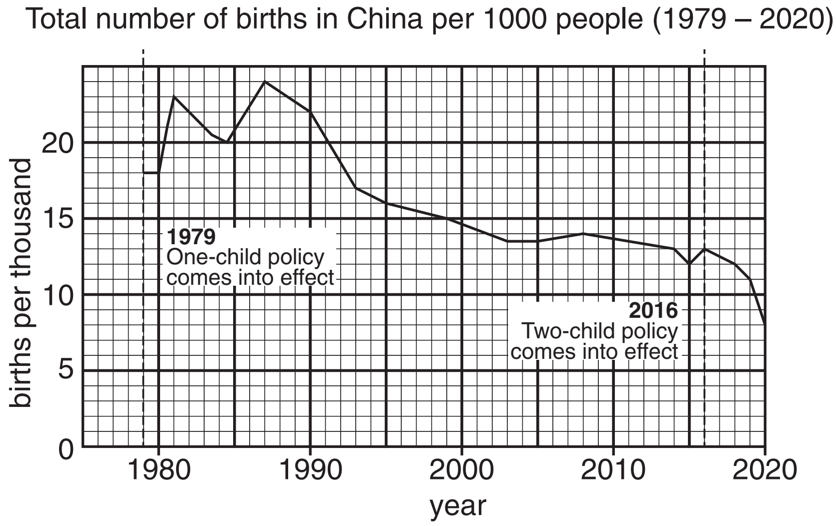

Fig. 10

(i) Calculate the change in birth rates between 1979 and 2016.

....

.... [1]

(ii) Identify from Fig. 10 the period when the birth rate declined the most.
Tick (✓) the correct box. [1]

Period	Tick (✓)
1980 – 1990	
1990 – 2000	
2000 – 2010	

(iii) Use Fig. 10 to describe the effect of the two-child policy introduced in 2016 on birth rates.

....

.... [1]

[Total: 9 marks]

SECTION C

Answer **either** Question 5 **or** Question 6.

5 Students carried out a fieldwork on industries. They conducted a survey at Matsapha industrial area.

The students agreed to investigate two hypotheses:

Hypothesis 1: *The industrial area has an impact on the quality of water in the local river.*

Hypothesis 2: *The industrial area has more negative than positive impacts on the people.*

(a) During their planning the students decided to do a preliminary visit to the industrial area.

(i) Suggest **three** reasons why the students carried out a preliminary visit to the industrial area.

1 ....

....

2 ....

....

3 ....

.... [3]

(ii) During the preliminary visit the students visited the local town offices to request a map of the industrial area, Fig. 11 (Insert).

State **one** advantage of using a map during a survey.

....

.... [1]

(b) To investigate **Hypothesis 1:** *The industrial area has an impact on the quality of water in the local river*, the students decided to do their investigation at six sites along the river. They identified three sites (1, 2 and 3) upstream of the industrial area and three sites (4, 5 and 6) along the industrial area.

The sites are shown in Fig. 11 (Insert).

(i) Suggest **one** reason why the students chose sites upstream of the industrial area and sites along the industrial area.

....

.... [1]

(ii) State **three** possible dangers the students may face when conducting their investigation along the river.

1 ....

....

2 ....

....

3 ....

.... [3]

(c) Table 2 shows the parameters of the water that were tested by the students.

Table 2

Parameter
Litter
Temperature
Oxygen level
pH
Chlorine level

The results of the students' average measurements for temperature, oxygen levels, pH and chlorine levels at each site are shown in Table 3.

Table 3

Site	Temperature (°C)	Oxygen level (mg/l)	pH	Chlorine levels (mg/l)
1	19.0	9.2	7.0	0.1
2	19.2	9.8	7.1	0.2
3	19.1	9.6	6.9	0.2
4	20.0	8.4	8.2	0.3
5	21.5	7.6	6.2	0.5
6	26.5	7.2	8.4	0.8

Fig. 12 shows the pH scale used by the students.

1	2	3	4	5	6	7	8	9	10	11	12	13	14

Acidic ◄——— Neutral ———► Alkaline

Fig. 12

The students plotted their results on Fig.13, Fig.14 and Fig.15.

Plot the average temperature value of the water at site 6 on Fig. 13. [1]

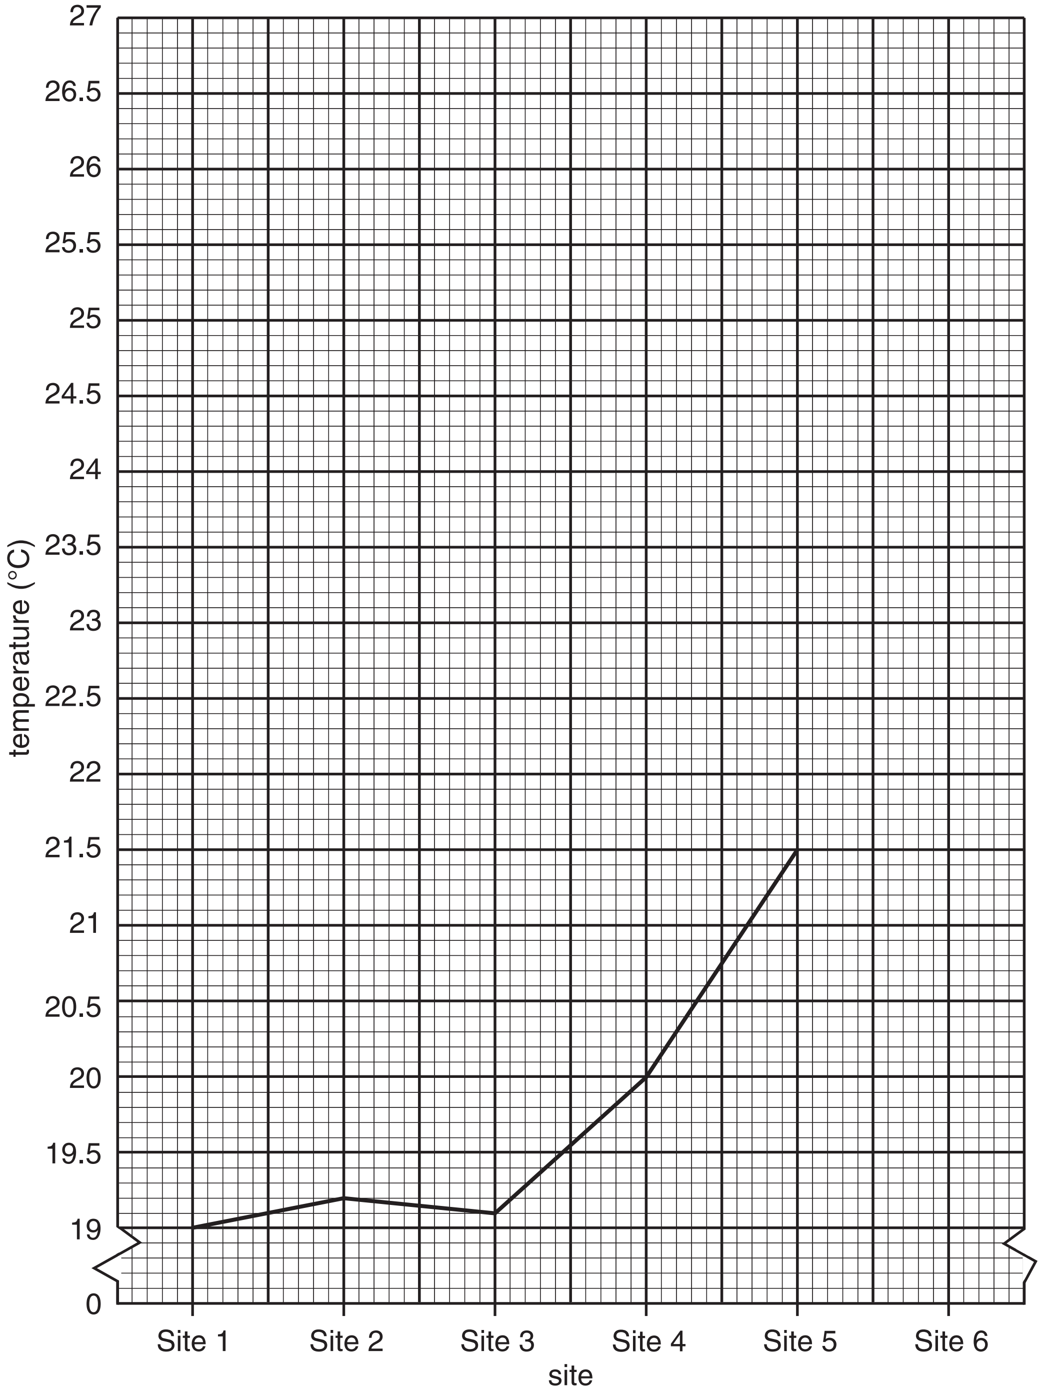

Fig. 13

For Examiner's Use

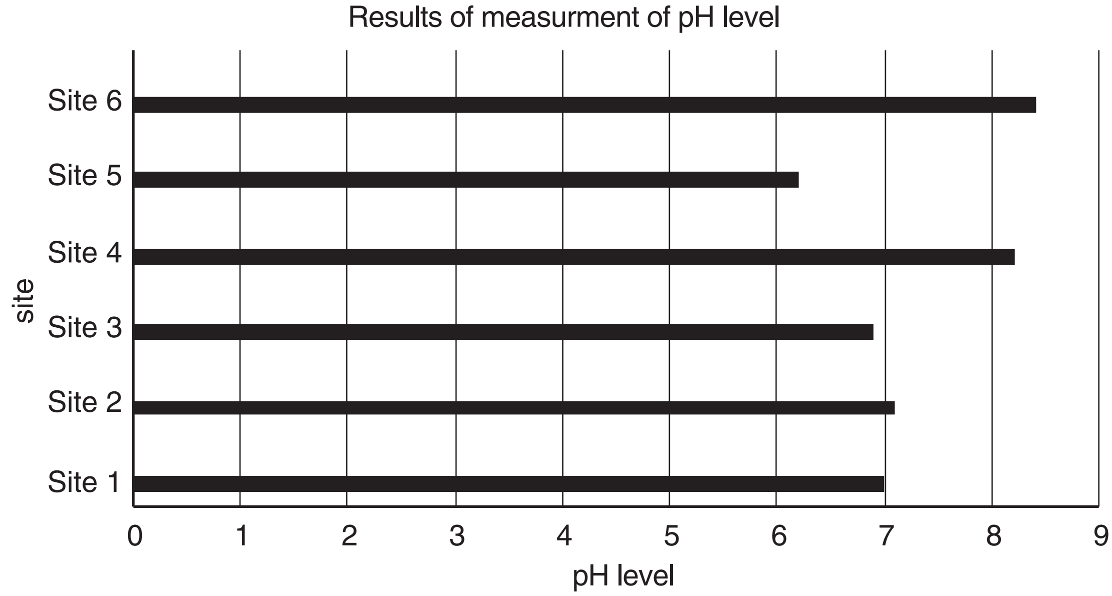

Fig. 14

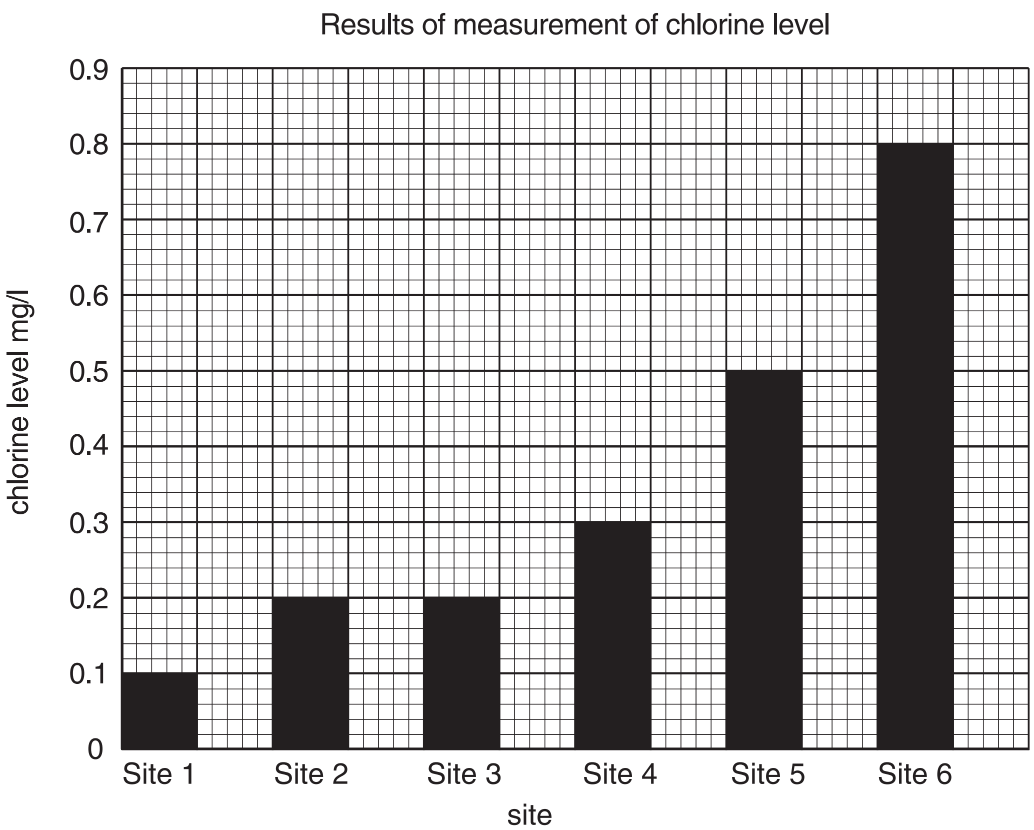

Fig. 15

(d) To investigate litter the students completed an environmental quality survey sheet, Fig. 16 (Insert).

Write a conclusion to **Hypothesis 1:** *The industrial site has an impact on the quality of water in the local river*. Use evidence from Table 3, Figs. 13,14,15 and 16 (Insert) to support your decision.

....

....

....

....

....

.... [3]

(e) Suggest **two** limitations to this investigation.

1 ....

....

2 ....

.... [2]

TURN OVER FOR QUESTION 5(f)

(f) To investigate **Hypothesis 2:** *The industrial area has more negative than positive impacts on the people*, they randomly interviewed 20 people found at the industrial area, asking them to rate the impact by ticking on an environmental quality survey sheet.

(i) Define *random sampling*.

....

.... [1]

(ii) State **two** advantages of random sampling.

1 ....

....

2 ....

.... [2]

(g) The students calculated the average score for each impact from the 20 people interviewed. These are shown in Table 4.

Table 4

Impacts		**Average score**	**Total score**
Positive impacts	Employment	4	**11**
	Transport	2	
	Facilities	1	
	Housing	2	
	Water supply	3	
Negative impacts	Noise	5	**22**
	Traffic congestion	4	
	Air pollution	5	
	Litter	3	
	Overcrowding	5	

For both positive and negative impacts:

1	2	3	4	5

low high

Plot the total scores for positive and negative impacts on the block bar graph, Fig. 17. [2]

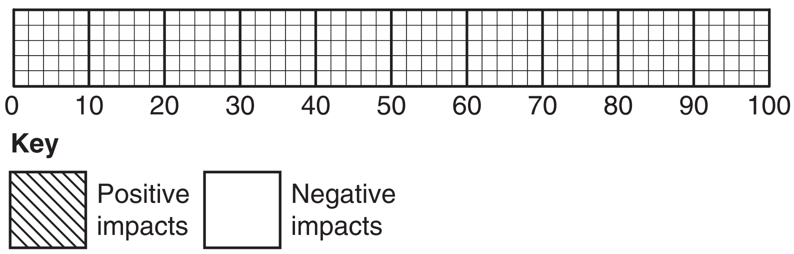

Fig. 17

(h) Write a conclusion to **Hypothesis 2:** *The industrial area has more negative than positive impacts on the people*. Use evidence from Fig. 16 (Insert), Fig. 17 and Table 4 to support your answer.

....

....

....

....

....

.... [3]

(i) Suggest **three** ways by which this investigation can be improved by the students.

1 ....

....

2 ....

....

3 ....

.... [3]

[Total: 25 marks]

6 Students at a local school in Eswatini were studying the impact of large scale commercial sugar cane farming on the people living in the area.

They agreed on two hypotheses:

Hypothesis 1: *The commercial farming of sugar cane has brought more benefits than problems to the local people.*

Hypothesis 2: *The number of shops and services has increased in the local town.*

(a) To investigate **Hypothesis 1:** *The commercial farming of sugar cane has brought more benefits than problems to the local people*, the students used a questionnaire, Fig. 18 (Insert). They agreed on a sample size of 100 homesteads which they visited.

(i) Suggest **two** ways to improve this questionnaire.

1 ....

....

2 ....

.... [2]

(ii) The students decided to use stratified sampling to select the homesteads.

State **two** advantages of using this method.

1 ....

....

2 ....

.... [2]

(b) The answers to Question 2: "What benefits have been brought by sugar cane farming to the area?" and Question 3: "What problems have been brought by sugar cane farming in the area?" are shown in Table 5 and Table 6 respectively.

Table 5

Benefit	**Responses (%)**
Better income	85
Created jobs	80
Better houses	55
Improved roads	60
Piped water supply	94
Electricity access	50

For Examiner's Use

Table 6

Problem	Responses (%)
Loss of land for subsistence crop farming	30
Decline in cattle ownership/Loss of grazing land	45
Increased population	40
Water access restriction/High water tariffs	35
Increased pollution	42

(i) The students plotted the information from Table 5 on Fig. 19.

Use the results in Table 6 to complete Fig. 20. [1]

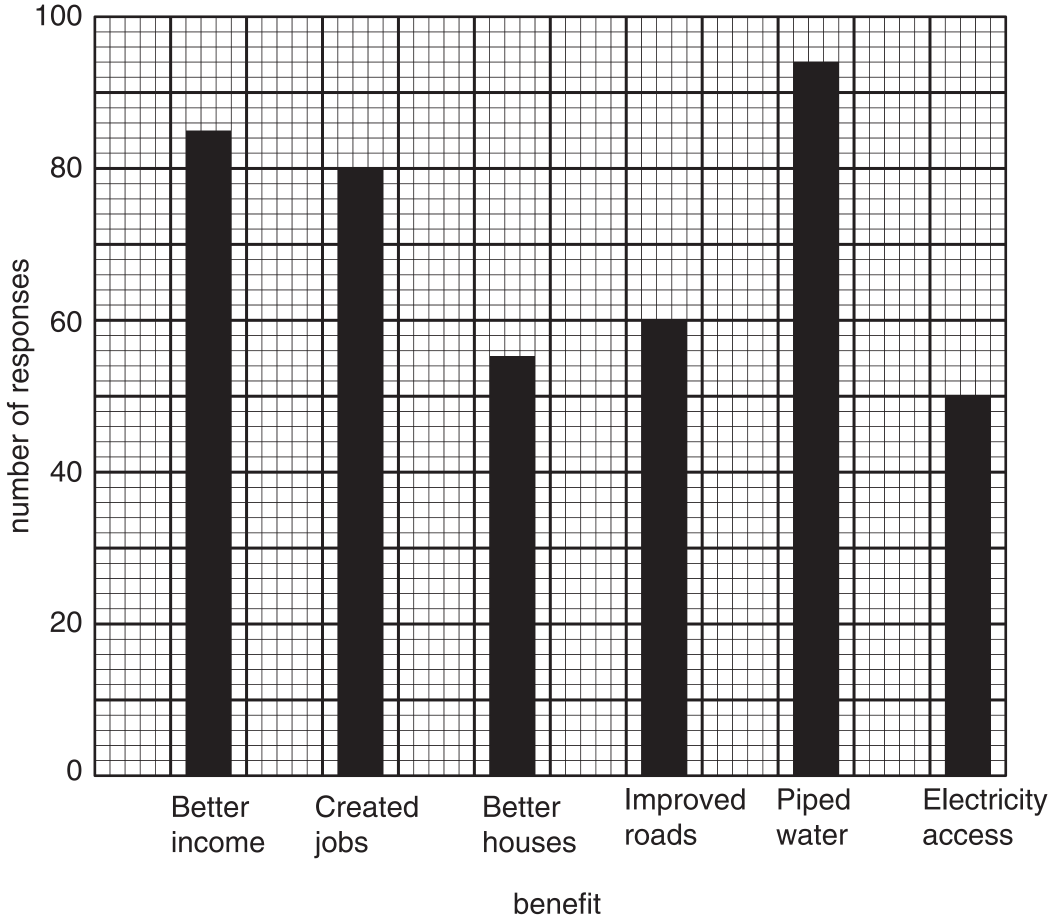

Fig. 19

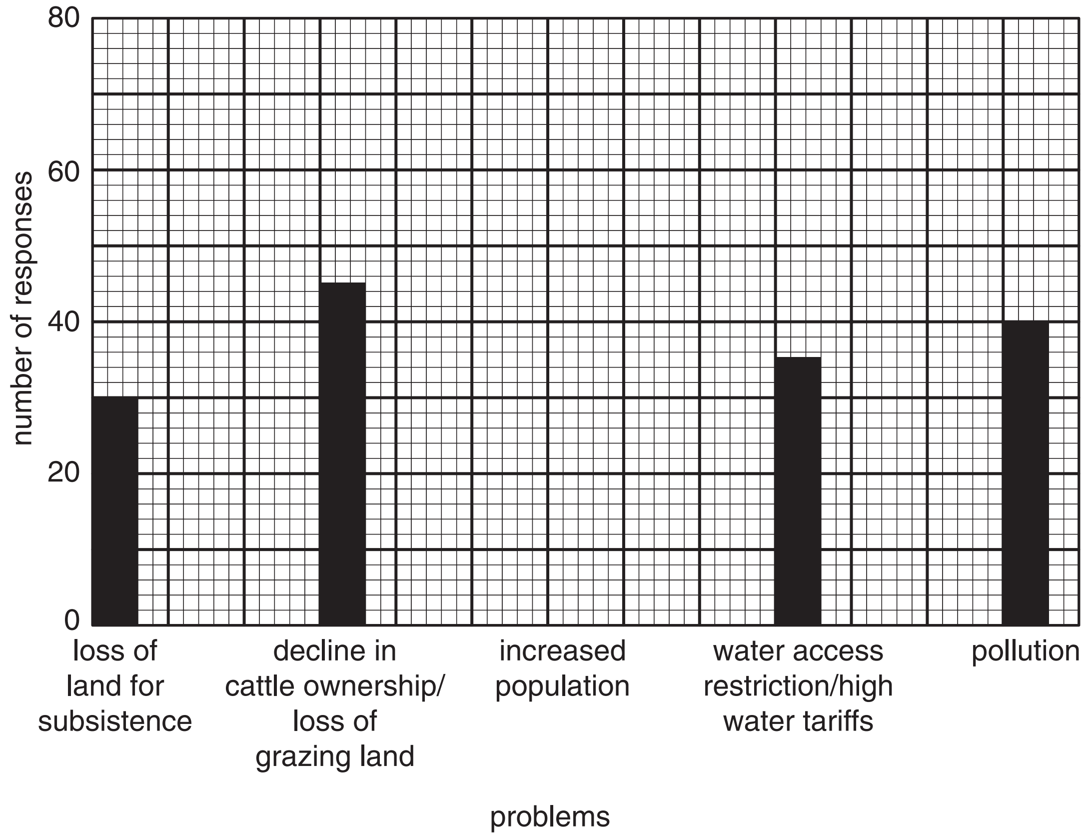

Fig. 20

(ii) Write a conclusion to **Hypothesis 1:** *The commercial farming of sugar cane has brought more benefits than problems to the local people*. Support your conclusion with evidence from Table 5, Table 6, Fig. 19 and Fig. 20.

....

....

....

....

....

.... [3]

(iii) State **three** other negative impacts of commercial farming on the environment besides pollution.

1 ....

....

2 ....

....

3 ....

.... [3]

(c) One of the problems brought by sugarcane farming was the loss of land for subsistence farming. The students decided to do a land use survey to find out how land use has changed in the area from 2010 to 2020.

They used maps from the government survey department produced in 2010 and 2020.

(i) State **one** advantage of using the map and **one** disadvantage.

Advantage ....

....

Disadvantage ....

.... [2]

(ii) Table 7 shows the results of the students' investigation. Use the results in Table 7 to plot the percentage (%) change for banana in Fig. 21. [1]

Table 7

Land use	**Area of land in 2010 (km^2)**	**Area of land in 2020 (km^2)**	**Percentage change**
Fallow land/ grazing land	210	120	−43
Maize	430	240	−44
Banana	1.4	1.8	29
Sugar cane	24	34	42
Local town	240	310	29

For Examiner's Use

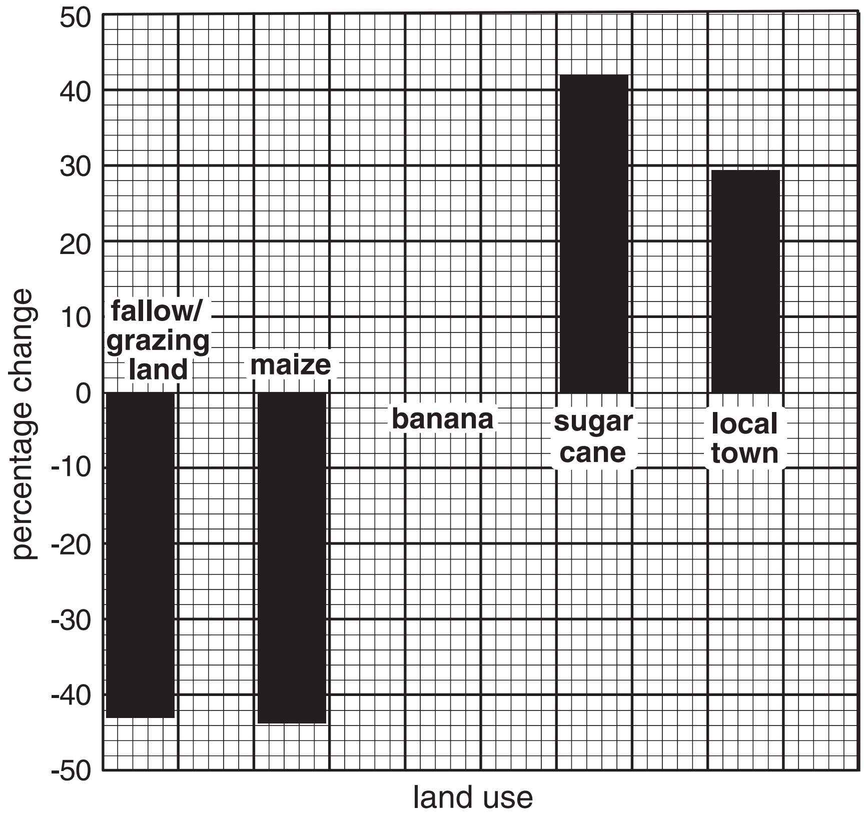

Fig. 21

(d) To investigate **Hypothesis 2:** *The number of shops and services has increased in the local town*, the students carried out a field work to find out and map the number of shops and services in the town in 2020.

They then compared the data they collected to data from 2010. Fig. 22 (Insert) shows the map in 2020.

(i) The students decided to classify the shops and services according to high and low order. What are *high order* goods?

....

.... [1]

For Examiner's Use

(ii) The students used the map of the town in 2010 to complete Table 8.

Use the information in Fig. 22 to complete Table 9. [4]

Table 8 (2010)

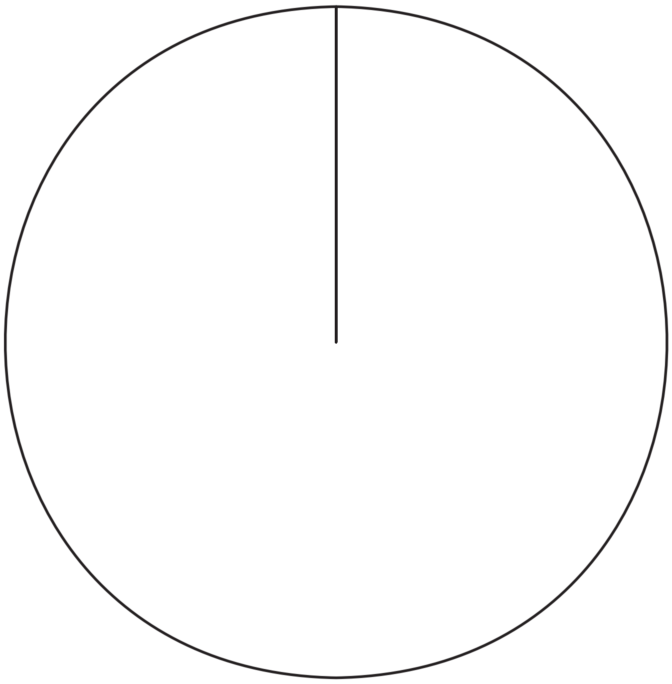
High order		**Low order**	
Type	**No.**	**Type**	**No.**
Furniture shops	2	Grocery shop	6
Pharmacy/Chemist	1	Fruit and vegetable shop	2
Bank	2	Butchery	3
Garage	2	Confectionery	1
Filling station	1	Clinic	1
Funeral parlour	1	Restaurant /Bar	2
MTN service centre	0		
Supermarket	1		
Total	**10**		**15**

Table 9 (2020)

High order		**Low order**	
Type	**No.**	**Type**	**No.**
Furniture shops	4	Grocery shop	10
Pharmacy/Chemist	2	Fruit and vegetable shop	2
Bank	4	Butchery	5
Post office	1	Confectionery	2
Filling station/garage	1	Clinic	2
Funeral parlour	1	Hair salon	3
Jewellery shop	1	Restaurant/Bar	....
MTN service centre	....		
Hardware store	....		
Supermarket	....		
Total			

For Examiner's Use

(iii) Use the results in Table 9 to complete the pie graph, Fig. 23 for the total number of high and low order goods, for the year 2020. [1]



High order Low order

Fig. 23

(e) Write a conclusion to **Hypothesis 2:** *The number of shops and services have increased in the local town*. Use evidence from Table 8, Table 9, Fig. 22 and Fig. 23 to support your answer.

....

....

....

....

....

.... [3]

(f) Suggest **two** ways by which this investigation can be improved to make the results more reliable.

1 ....

....

2 ....

.... [2]

[Total: 25 marks]
