

Confidential

MARK SCHEME

1. (a) (i) Style features of a lady's skirt

- A. Belt carrier
- B. Skirt waistband/ waistband
- C. Faced hip pocket /pocket facing
- D. Fly zip/ Zip fastener/Fly opening
- E. Centre front seam/seam

(One mark for each)

[5]

(ii) Three pattern pieces used to make the skirt

- Skirt front
- Skirt back
- Pocket
- Pocket facing
- Waistband
- Belt carriers

(Any three, one mark each)

[3]

(iii) Description of Denim fabric.

Fibre: Cotton

Structure: Twill weave

Appearance: White weft threads, woven with blue warp threads and they are closely packed, forming diagonal ridges on the right side/ right side is coloured, and the wrong side is pale/white. (Any one of these would be worth a mark).

Weight: Medium weight/heavy weight.

(One mark for any of the above)

[4]

(b) Disadvantages of using commercial patterns

- The tissue pattern pieces can be easily torn
- Some design details on the pattern may not suit the figure
- Pattern may need adjustments in some areas
- It inhibits creativity
- It is more expensive

(Any four, one mark each)

[4]

(c) Functions of sewing machine parts

(i) Throat plate

- covers the area around the feed dog.
- Seam allowance width guide

(ii) Presser foot

- It holds fabric in place while sewing

(One mark for correct point)

[2]

(d) (i) Functions of hand stitches.

Backstitch - to join pieces of fabric together permanently

- to repair seams/ make seams

Slip hemming - to secure hems/ sew hems pf garment

(One mark for each point)

[2]

(d) Function of sewing attachments

- (i) **Button foot** - holds flat buttons in position for attaching with machine zigzag stitch.
- (ii) **Zipper foot** - used to stitch cording, insert zippers, to stitch tiny seams that have more bulk on one side than the other.
- (iii) **Narrow hemming foot** - automatically turns the raw edge of the fabric under and over while stitching. **(One mark for correct point)** [3]

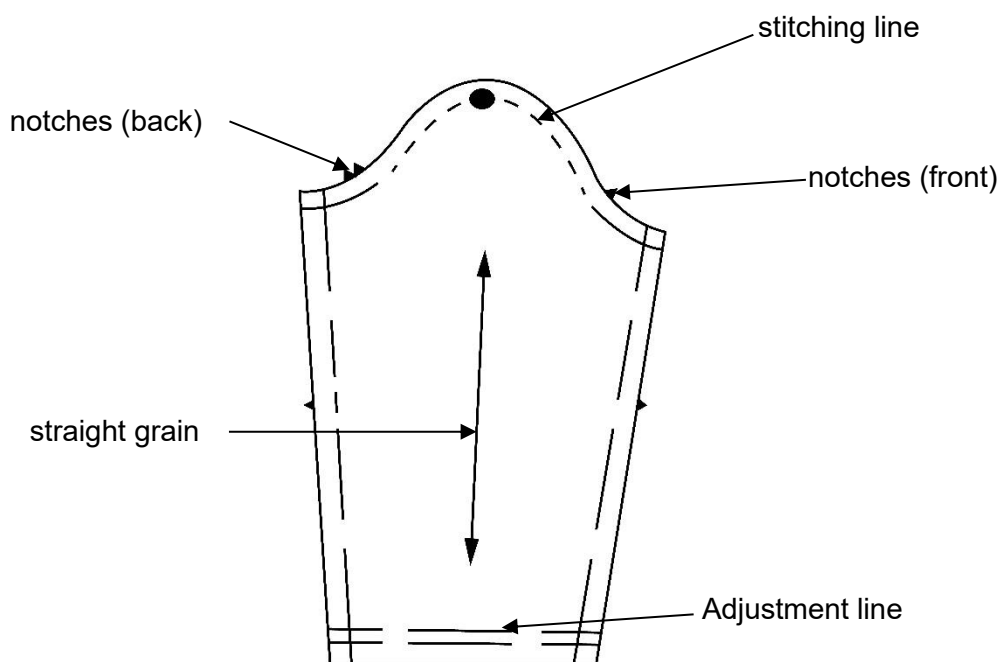

(e) Explanation of terms and examples of fibres

- (i) **Retting** - flax stalks are soaked in natural water or water tanks - to allow the woody part to soften and rot, to enable easy removal of the fibres, e.g. Flax, hemp, coir, coconut, linen. [3]
- (ii) **Carding** - fibres go through a carding machine - to remove remaining impurities/disentangle the fibres and arrange them in parallel, e. g. cotton and wool. Carding makes fibres sliver ready for spinning.

(Two marks for an explanation and one mark for an example).

[3]

(f) Pattern Markings

(Any four correctly positioned markings)

[4]

(g) To apply a print patch on a boy's pair of trousers.

- Cut out a squared/rectangular piece of fabric of the same design.
 - A piece of fabric to have the same weight and colour as trousers to cover the tear.
 - Position the patch on the right side, matching the pattern and tack in position.
 - With WS of patch facing RS of trousers, fold raw edges under onto the wrong side and over-sew folded edges of the patch with tiny invisible stitches.
 - Fold raw edges of the patch on WS, pin and tack on the trouser. Machine stitch around the edge
 - Neaten raw edges on WS of the patch with blanket stitch
 - Press
- (Any four points for a correct procedure) [4]**

(h) Differences between:

(i) Primary and secondary colours:

Primary colours- basic colours from which all other colours are produced

Secondary colours-made from mixing two primary colours in equal amounts

(One mark for well explained point)

[2]

(ii) With nap and one-way design:

With nap - the fabric has a surface pile/ raised surface

One way design - is a fabric that has the design facing the same direction

(One mark for well explained point)

[2]

(iii) Woven interfacing - piece of fabric that has a warp and weft threads and straight grains that is closely woven to strengthen part of a garment, e.g. facings.

Bonded interfacing - man made that are bonded, with no straight grain to strengthen parts of a garment.

(One mark for well explained points)

[2]

SECTION B

Answer **two** questions in this section.

2. (a) **Reasons for making own clothes**

- Saves money/ cheap
- Choose own fabric/pattern/colour
- Make unique garment
- Make garment accurately to body measurements
- Recycle
- Improve sewing skills
- Satisfaction of making own clothes

(Any two, one mark for correct point)

[2]

(b) **Characteristics of well-sewn hem**

- No puckering in the hem
- width is appropriate for garment and even
- Hand stitching is uniform in size and does not show on the RS
- Well pressed
- Hangs straight when the garment is worn

(Any two correct points)

[2]

(c) **To know your figure type when choosing clothing.**

- to construct or choose styles that would accentuate/complement your figure type, e.g. a short well - proportioned heavy figure should choose vertical lines, and avoid clinging fabric as they increase in size.
- to disguise figure faults e.g. a short, thick neck should choose V- necklines and long pointed shirt collars. Thick upper arms- choose long or $\frac{3}{4}$ length sleeves.

(One mark for a point [max 2], two marks for a well-explained point with an example).

[4]

(d) **Advantages of using knitted fabrics**

- **They stretch** - important where fit and comfort are concerned/ they fit snugly but do not restrict movement.
- **Excellent** recovery – ability of fabric to return to its shape after being stretched/worn.
- **Warmth** - the gaps in knitted fabrics trap air making them warm to wear in cold weather
- **Wrinkle resistant** - shed wrinkles easily

(Any two advantages, one mark for an advantage, two marks for a well explained advantage)

[4]

(e) **Mercerising** - fabrics are treated with sodium hydroxide/caustic soda under uniform tension and moderate heat conditions.

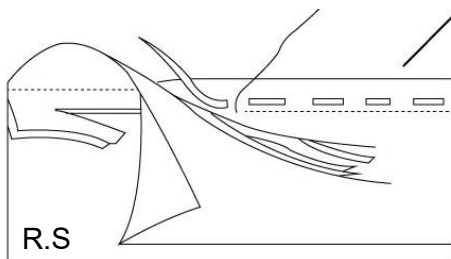

(Two well-explained points)

[2]

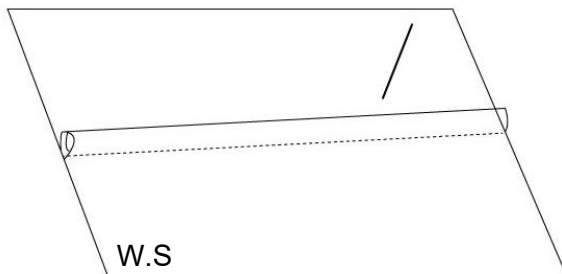

(f) **How to sew a French seam**

- With W.S. together, tack 5mm above the fitting line and stitch below the line of tacking
- Remove tacking and trim raw edges to 5 mm
- Press seam with raw edges turned the same way

- Turn the garment to W.S.
- Pin and tack on fitting line with right sides facing/ together
- Machine stitch in W.S. Remove tacking and press.

(Credit a well-labelled diagram)

[6]

[TOTAL MARKS:20]

3. (a) Fashion fad - Short lived fashion, accepted by a 'certain age group'

[1]

(b) Two ways to neaten lower edge of a sleeve

- Hem
- Cuff/ band
- Elasticated casing/ elastic
- Flounce
- Frills/ piping/ lace
- Crossway strip/ binding

(Any two, one mark for correct point)

[2]

(c) Advantages of cotton/polyester blend

- Fabric will not crease easily
- Fabric does not soil easily/does not absorb stains
- Ironing ability is improved
- The shape of the garment is improved
- Appearance and comfort are improved

(Any three)

[3]

(d) Why stains are removed as soon as they occur- to prevent stains from fixing on the fabric or to make it easier to remove the stain.

[2]

(e) Importance of care labelling is important in garments - to give information on the care or laundering of the garment, e.g. washing, ironing, drying or dry cleaning.

- so clothes will last longer - to maintain the quality/appearance of a garment
- so garments do not shrink - so garments are not burned /melted.

(Any one well-explained point)

[2]

(f) Effect of warm colours in clothing.

- they catch the eye and draw attention
- make the object seem bigger and closer
- create a feeling and appearance of warmth
- create a cheerful feeling for the wearer

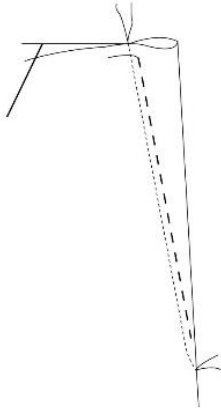

(Any three)

[3]

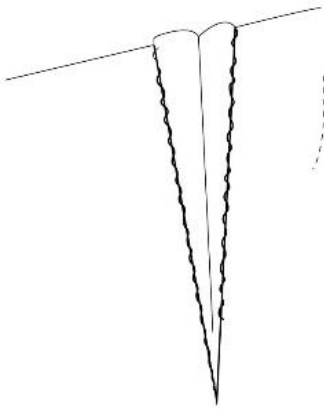

(g) How to sew a single pointed dart on a thick fabric.

- fold along the fold line with R S together
- match balance points
- pin and tack on the stitching line

- machine stitch from the wide end tapering to the point

- secure and press
- cut dart open along the fold, press open
- neaten the edges and press open

(Credit a well-labelled diagram)

[7]

[TOTAL MARKS:20]

4. (a) Description of easing

- (i) **Easing** - Shortening the length of an edge of fabric without any apparent reduction of fullness making a large piece of fabric fit with a smaller piece of fabric as a seam is sewn. Gathers do not show on the right side. [1]

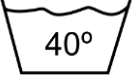

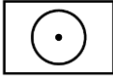

(ii) Position where easing is applied on garments

- waist
- sleeve head
- princess line seam.
- hip
- bust

(Any one correct position)

[1]

(b) Care symbols on a garment made of acrylic

WASHING	DRYING	IRON
 Wash in luke warm water 40°	 Dry flat	 Cool Iron
 Hand wash	 Tumble Dry	

(Any three, one mark for correct symbol)

[3]

(c) Types of embellishment suitable for child's dress

- Lace - Ribbon - Ric Rack – Piping – Embroidery – Applique – Sequins - Smocking etc.

(Any two, one mark for each)

[2]

(d) Reason for the following pocket guidelines

- (i) **Reinforcing top edges** – to strengthen and secure pockets
- (ii) **Attach on pocket placement line** – to make sure pockets serve their purpose

[2]

(e) Factors that influence the selection of the following:

- (i) **Thread** – **the** colour of the thread should match the colour of the fabric
- thickness of thread should match weight of fabric
- (ii) **Interfacing** - buy same weight as garment
- buy suitable interfacing, whether woven or fusible
- buy closest colour to fabric

(Any two points for each notion)

[4]

(f) Preparing and attaching gathered bodice on Yoke

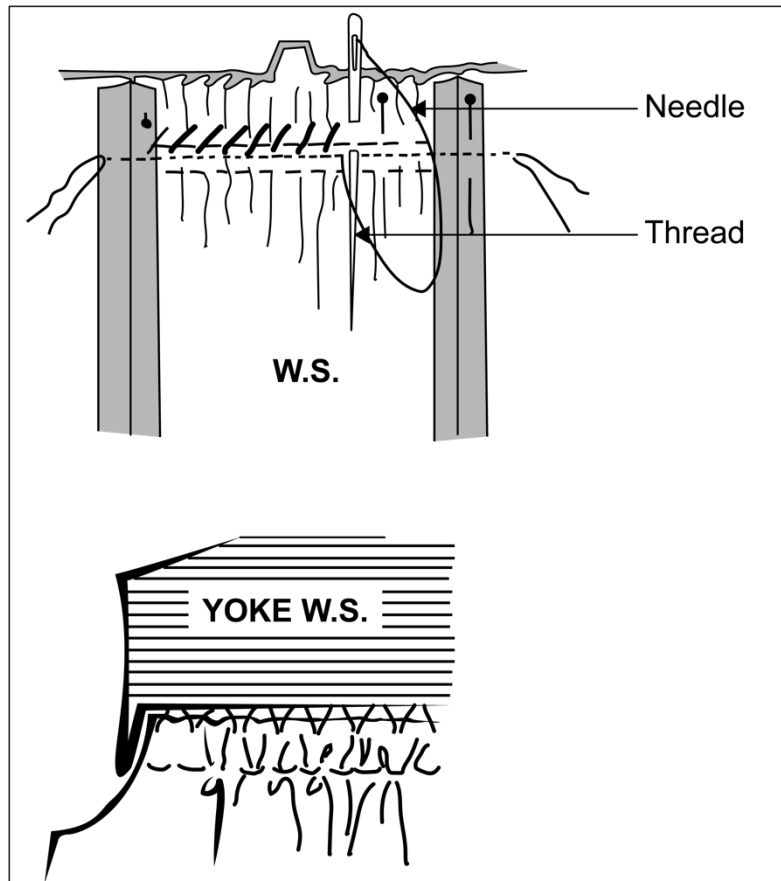

Preparation

- Lengthen stitch on the machine to maximum
- Sew two rows of gathering stitches 6mm above and below the FL.
- Secure one end of bobbin threads
- Pull threads to make gathers, secure threads on one side
- Distribute gathers evenly

Attaching

- With R.S of bodice and **yoke** together, match raw edges, notches and FL
- Pin, and sew diagonal tack on the fitting line.
- Machine stitch on FL, making sure the gathered side is uppermost
- Neaten the seam
- Press

- Under stitch or top stitch the seam if desired

(One mark for well explained point. Credit diagram)

[7]

[TOTAL MARKS:20]

SECTION C

5. (a) Factors to consider when evaluating the fit of a garment.

All garments are supposed to fit the body comfortable. When evaluating whether a garment fits or not, one should consider the following points:

Appearance of garment-darts and seams fall in the proper positions

- Shoulder seams should rest smoothly at shoulder tops
- Darts should taper towards and stop just short of the fullest part of the area they shape e.g. bust area and hip line
- Hems should hang evenly and parallel to the floor
- Waist seams should rest on the natural waist or fit according to style e.g. drop waist style

Comfort

- A comfortable garment should allow one to sit, bend, walk and reach without restricting him /her or straining the garment.
- Design of garment should be kept in mind when garment is fitted.
- Make sure close fitting designs are not too tight generally or in certain areas.
- Clinging fabrics have a tendency of defining the shape of the body even if the garment is loose fitting.

Design

- It is important not to over-fit close fitting design as this can result in strained seams and wrinkles on the garment.
- Close fitting garments tend to stay near the body and hug it more in some areas,

Fabric - Important in the fit of a garment- follow suggested fabrics

- Styles for 'stretch knit only' rely on 'give', have a clinging tendency even if the garment is loose fitting e.g. knitted fabric

A garment which fits well should have:

- **Well-fitting shoulder seams** - they should lie smoothly without wrinkles
- **Well-fitting bust** - the bust line should lie over the bust line of the body. All darts should point towards the bust and the fullness they provide should accommodate the curve of the bust
- **Under arm seams** - should lie straight and smoothly without strain
- **Position of waistline** - will depend on fashion and the style of garment e.g. some dresses have a drop waistline, whilst others have a high waist.
- The garment should fit fairly tightly at the hip, but should not be too tight and wrinkled across the front and side seams (2cm bigger than the body) to allow for ease.

- Fasteners that overlap should have enough room to prevent gaping and evenly distributed.

[TOTAL MARKS:20]

BAND	MARKS	DESCRIPTION
High Band	14 - 20	- Define a 'good fit' accurately - Discussed most points to consider when evaluating a garment. - Give most examples of problem areas on garments - Explained most points on qualities of a good fit. - Used correct technical terminology. - Show understanding of topic
Middle Band	7 – 13	- Definition of good fit with some facts presented. - Discussed some points to consider when evaluating a garment. - Give most examples of problem areas on garments - Explained some points on qualities of a good fit. - Used some correct technical terminology. - Show some understanding of topic
Low Band	0 - 6	- No definition of good fit - Give few or no examples of problem areas on garments - No explanation of qualities of a good fit. - Used incorrect terminology. - Show very little understanding of topic

5 (b. Wardrobe planning for a teenager

- **Definition of wardrobe**
- **Peer pressure among teenagers** - they are forced to conform in dress-group identity
- **Take stock of the clothes in your wardrobe** - decide which are useful after alterations, renovation and dry cleaning - these give new life to garments - Make a list of what you have in your wardrobe to avoid buying same articles/styles
- **Consider hobbies and activities** - so you buy clothes suitable for your lifestyle
- **Money available** - to avoid waste and keep within budget
- Purchase most **essentials** first and spread the rest of purchases over a period of time
- **Plan new purchases** - to "mix and match" with clothes already have to expand your wardrobe
- Select garments of style and serviceable colour e.g. skirt and jackets etc. - because they should last a long time
- Consider figure type
- **Change appearance of clothes** - by adding accessories likes scarves, necklace etc.
- **Do not change your mind easily** - once you have made a decision, always keep colour in mind when buying new clothes
- **Go shopping when shops are not crowded** - so you can decide calmly without being hurried
- Avoid impulsive buying
- Make use of 'end of season' and sale range
- **Make sure clothes** - you buy can be easily laundered
- Get maximum value for money
- Buy easy to launder garments
- **Decide the quality of clothes** - by studying the label and pay attention to:
 - name of manufacturer

- fibre content
- colour fastness
- special finish - e.g. special directions for laundering
- Choose accessories wisely
- Do not follow fashion blindly- avoid fashion fads

(One mark for any well explained point)

[20]

BAND	DESCRIPTOR
High Band 15 - 20	- Discussed a wide range of factors to consider when planning a wardrobe for a teenager - Identifies points relevant to teenagers and gives reason and examples to justify the factors given - A well organised answer - Used correct textiles terminology
Middle Band 8 - 14	- Discussed some factors to consider when planning a wardrobe for a teenager - Identifies some points relevant to teenagers and give some reasons and some examples to justify the factors given - Answer not so well organised - Used some correct terminology
Low Band 0 - 7	- Discussed a few points to consider when planning a wardrobe for a teenager - Identifies very few factors relevant to teenagers and give few reasons and few examples to justify the factors given - Gave few or no examples - Used very little or no correct terminology
