Paper 1 Short Answers

October/November 2027-2029

Specimen

1 hour

Candidates answer on the Question Paper.
Additional Materials: Calculator.

READ THESE INSTRUCTIONS FIRST

Write your centre number, candidate number and name in the spaces provided.
Write your answers in dark blue or black pen.
You may use an HB pencil for any diagrams, graphs or rough working.
Do **not** use staples, paper clips, glue or correction fluid.
Do **not** write on the bar code.

Answer **all** questions.

You may lose marks if you do not show your working or if you do not use appropriate units.
The number of marks is given in brackets [] at the end of each question or part question.
The total mark for this paper is 40.

For Examiner's Use

--

This document consists of **8** printed pages.

- 1 Figure 1.1 shows an organism.

Figure 1.1

Name the phylum and class to which the organism in Figure 1.1 belongs.

phylum.....

class..... [2]

- 2 Figure 2.1 shows a fungus called *Rhizopus stolonifer*.

Figure 2.1

- (a) State the species name for the organism shown in Figure 2.1.

..... [1]

- (b) State the type of reproduction shown in Figure 2.1.

..... [1]

- 3 (a) In the human body, some of the uses of energy from respiration are muscle contraction, growth, cell division and maintenance of a constant body temperature.

Name **one** other use of energy in the human body.

..... [1]

- (b) Name the process represented by the following equation and state where it occurs.

process.....

where it occurs..... [2]

- 4 State what happens to external intercostal muscles and pressure in the lungs when a person breathes in.

external intercostal muscles.....

pressure in the lungs..... [2]

- 5 State how stomata enable photosynthesis to take place.

..... [1]

- 6 Transpiration pull and translocation are processes by which substances move in plants.

Complete Table 6.1 to compare the two processes.

Table 6.1

process	substance transported	tissue through which movement takes place
translocation	amino acids +	
transpiration pull	water +	

[2]

- 7 Figure 7.1 shows the relationship between a blood vessel, some body cells and the lymphatic system.

Figure 7.1

- (a) Name the blood vessel labelled A.

..... [1]

- (b) Name **one** substance that diffuses in the direction shown by the arrows in Figure 7.1.

..... [1]

- (c) Describe the function of the lymphatic system when the body is suffering from gonorrhea.

..... [1]

- 8 Figure 8.1 shows a photograph of a plant found in a certain environment.

Figure 8.1

State, with a reason, the environment to which the plant in Figure 8.1 is adapted.

environment.....

reason..... [2]

- 9 Describe how blood vessels near the surface of the skin in a human help in regulating the body temperature when it falls below normal.

.....

.....

..... [2]

10 Figure 10.1 shows the structure of a kidney tubule and its associated blood vessels.

Figure 10.1

(a) Name the process that occurs at **B**.

..... [1]

(b) Name **one** substance reabsorbed into the blood at **C**.

..... [1]

11 Describe how low levels of luteinizing hormone affect the menstrual cycle.

..... [1]

12 State **one** treatment that may be given to those suffering from cervical cancer.

..... [1]

13 Figure 13.1 shows a food web in a given ecosystem.

Figure 13.1

(a) Identify the trophic level of the thrush.

..... [1]

- (b) State the advantage to the hawk of feeding on the rabbit rather than on the thrush.

.....

 [2]

- 14 State **one** undesirable effect on animal cells of nuclear fall-out.

..... [1]

- 15 Figure 15.1 shows part of a DNA molecule. The base guanine (G) is paired to a base labelled D.

Figure 15.1

- (a) State **one** other visible structure that identifies the molecule in Figure 15.1 as DNA.

..... [1]

- (b) Name the nitrogenous base labelled D.

..... [1]

- 16 Alien plants such as water hyacinths are a threat to biodiversity.

State why alien plants are a threat to biodiversity.

..... [1]

- 17 State **two** features of a wind-pollinated flower.

1.....

2..... [2]

- 18 Describe the surface of a human molar tooth and explain how it is related to its function.

.....

 [2]

19 Figure 19.1 is a diagram showing a pathway followed by an impulse during a reflex action.

(a) Name the structure labelled **E** in Figure 19.1.

..... [1]

(b) Draw a line labelled **F** to identify an effector.

[1]

20 State **two** reasons why bacteria are useful organisms in genetic engineering.

1.....

2.....

[2]

21 Excessive consumption of alcohol leads to social problems.

State **one** long term effect arising from excessive consumption of alcohol.

..... [1]

22 Describe what happens to the ciliary muscle in the eye when a person reads a book.

..... [1]
