

Section A

Answer **all** questions in this section.

A1 A logo for a jewellery shop is shown.

Complete the full-size drawing of the logo by adding:

- (a) the circle [2]
- (b) the diamond shape [6]
- (c) the top crown shape [5]
- (d) the outer octagon. [3]

A2 The logo image will be enlarged and used on the front window of the jewellery shop.

The window is shown.

State the largest scale or ratio that the logo can be enlarged by to fit the window.

A3 The logo will also be used on a sign outside the jewellery shop.

The sign and wall bracket are shown.

The wall bracket is made from 20 mm wide x 5 mm thick steel bar.

Complete the full-size isometric view of the wall bracket. [7]

isometric view

Section B

Answer **one** question, **either** Question **B4** or **B5**, from this section.

B4 Orthographic views of a jewellery display stand are shown.

(a) Complete the planometric view of the jewellery display stand to a scale of 1 : 2. [12]

(b) A model of the jewellery display stand is to be made from Styrofoam blocks.

One of the Styrofoam blocks is shown.

(i) Render the block to look like Styrofoam. [3]

(ii) State **one** suitable tool for cutting the Styrofoam block to size. [1]

(iii) The JEWELLERY lettering will be produced using CAD/CAM.
Describe a suitable method of producing and applying the JEWELLERY lettering to the front of the block.
[3]

(c) An alternative design for a jewellery stand is shown.
The jewellery stand is made from 5 mm thick foamboard.

Sketch a method of attaching the shelf to the upstand without the use of adhesive. [4]

(d) Information about the different types of jewellery sold in the shop is shown in the table.

jewellery type	necklaces	bracelets	rings
number sold	25	19	38

Draw a bar chart to show the information in the table. [2]

B5 A package for jewellery items is shown.

(a) Complete the development (net) of the jewellery package lid. [12]

- (b)** The jewellery package will be produced in quantities of 5000.
- (i)** State a suitable method of printing the JEWELLERY text onto the developments (nets).
..... [1]
 - (ii)** State a suitable process for cutting and creasing the developments (nets).
..... [1]
 - (iii)** The lid of the jewellery package comes off too easily when in use. Sketch a method of locking the lid onto the base without the use of adhesive. [3]

(c) A jewellery box is shown.

Complete the estimated two-point perspective view of the jewellery box. [8]
