MARK SCHEME

Maximum Mark: 50

Published

This mark scheme contains the instructions and marking guidance that our examiners used to mark candidate responses for this component.

Before they start marking, examiners complete a standardisation process. They review a range of candidate responses and discuss the mark scheme in detail to agree which answers can and cannot be accepted. Examiners award marks where it is clear that candidate responses have met the requirements of the mark scheme. These requirements may vary between different components or different versions of the same component, depending on the exact requirements of the question and the candidate responses seen during the standardisation process.

Sometimes, our mark schemes may allow marks to be awarded to responses which contain elements that are factually incorrect or for content not covered by the syllabus. We do this in response to the demands of a specific question to support candidates and make sure that our assessments are fair. However, these allowances should not be used as a guide for teaching and learning.

We cannot discuss the mark scheme with schools, and we recommend that schools read the mark scheme together with the assessment material and the Principal Examiner Report for Teachers.

This document consists of 8 printed pages.

General marking principles

All examiners must apply these marking principles when marking candidate responses.

1	Examiners must award marks for each response in line with: - the specific content defined in the mark scheme - the specific skills defined in the mark scheme or in the level descriptions - the standard of response required as exemplified by the standardisation scripts.
2	Examiners must award whole marks (not half marks, or other fractions).
3	Examiners must award marks positively. This means that: - marks are not deducted for errors or omissions - marks are awarded for correct/valid answers as defined in the mark scheme and also for other valid answers which go beyond the scope of the syllabus and mark scheme referring to your team leader as appropriate - the quality of spelling, punctuation and grammar are judged only when the mark scheme indicates that these features are specifically assessed in the question. However, the meaning of all responses must be unambiguous.
4	Examiners must consistently apply the requirements of the mark scheme and any rules for what to do when candidates have not followed instructions correctly.
5	Examiners must use the full range of marks defined in the mark scheme, unless limited by the quality of the candidate responses seen.
6	Examiners must award marks according to the mark scheme and must not award marks with grade thresholds or grade descriptions in mind.

Annotations guidance for centres

Examiners use a system of annotations as a shorthand for communicating their marking decisions to one another. Examiners are trained during the standardisation process on how and when to use annotations. The purpose of annotations is to inform the standardisation and monitoring processes and guide the supervising examiners when they are checking the work of examiners within their team. The meaning of annotations and how they are used is specific to each component and is understood by all examiners who mark the component.

We publish annotations in our mark schemes to help centres understand the annotations they may see on copies of scripts. Note that there may not be a direct correlation between the number of annotations on a script and the mark awarded. Similarly, the use of an annotation may not be an indication of the quality of the response.

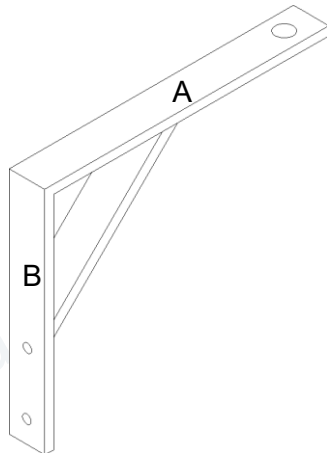

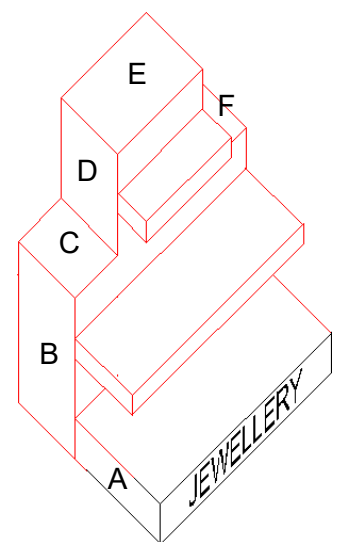

The annotations listed below were available to examiners marking this component in this series.

Annotations

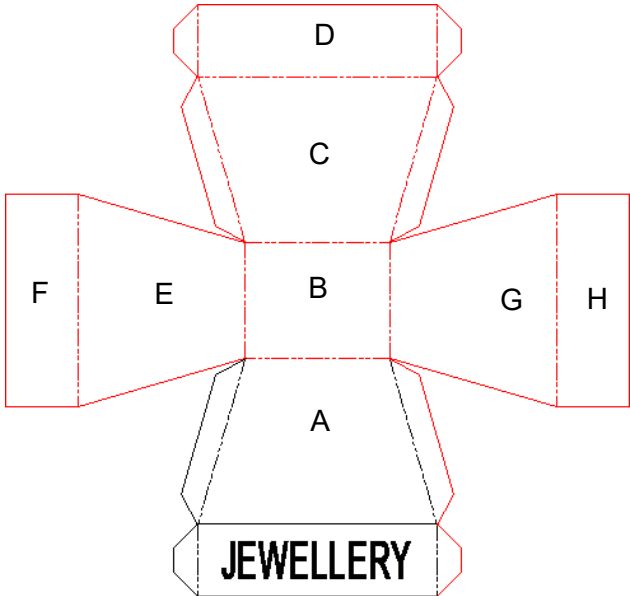

Annotation	Meaning
	Incorrect point
	Indicates that the point has been noted, but no credit has been given
	Correct point
Numbers	Indicating the mark allocated for the response

PUBLISHED

Question	Answer	Marks	Guidance
A1(a)	Circle in correct position [1] Circle correct to overlay [1]	2	
A1(b)	One equilateral triangle correct to overlay [1] Both equilateral triangles correct to overlay [1] Bottom triangle 60 mm high [1] Bottom triangle 100 mm wide [1] Two additional diagonals inside bottom triangle correct to overlay / candidate solution [1] Two additional diagonals in top section correct to overlay / candidate solution [1]	6	
A1(c)	Line at 30° to left of vertical [1] Arc added to left side [1] Arc correct to overlay / candidate solution [1] Arc added to right side [1] Arc correct to overlay / candidate solution [1]	5	
A1(d)	Any octagon [1] Any regular octagon in correct orientation [1] Octagon correct to overlay [1]	3	

Question	Answer	Marks	Guidance
A2	5 times / multiply by 5 / some understanding of 5 times size [1] Correct ratio given 5:1 [2]	2	Allow 1 mark for 1:5
A3	Top face of bracket 'A' correct to overlay [1] Side face of bracket 'B' correct height to overlay / candidate width [1] 5 mm thickness to top face and side face [1] Any diagonal brace added [1] Any brace with 5 mm thickness and correct width [1] Brace added at 45° [1] Brace correct to overlay [1]	7	
B4(a)	Base side 'A' correct to overlay [1] Side 'B' correct to overlay [1] Face 'C' correct angle and length [1] Side face 'D' correct height to overlay / candidate solution [1] Top face 'E' correct width to overlay / candidate solution [1] Top shelf correct depth and thickness [1] Top shelf in correct position [1] Bottom shelf correct depth and thickness [1] Bottom shelf in correct position [1] Width of main section correct to overlay [1] Top face of base correct to overlay [1] Right side top face 'F' added correct to candidate solution [1]	12	

Question	Answer	Marks	Guidance
B4(b)(i)	Any texture added [1] Shading / colour added [1] High quality rendering that looks like Styrofoam [1]	3	
B4(b)(ii)	Hacksaw / tenon saw / band saw or any suitable named saw [1] Hot wire cutter [1] Craft knife / Stanley knife or other named knife [1]	1	Do not allow 'saw' or 'knife' on its own.
B4(b)(iii)	Lettering produced on computer / CAD [1] Lettering / template cut out on vinyl cutter / printed onto card/paper [1] Vinyl backing removed and stuck on / template with spray paint / stuck on with adhesive [1]	3	
B4(c)	Any method shown [1] Any appropriate graphic method shown that does not use adhesive [1] Method shown that would work suitably [1] High quality communication – method clearly communicated using sketches and notes [1]	4	If two shelves, fitting into a slot on either side of the upstand do not award third mark. Method shown must use graphic materials - Do not accept methods for resistant materials eg. Nails, screws, brackets etc.
B4(d)	Bar chart drawn with appropriate axis', scales and labels [1] Information bars added correctly [1]	2	

Question	Answer	Marks	Guidance
B5(a)	Face 'A' correct to overlay [1] Lid centre 'B' correct to overlay [1] Face 'C' correct to overlay [1] Face 'D' correct to overlay [1] Face edge 'E' correct base width [1] Face 'E' correct depth [1] Face 'F' correct depth to candidate solution [1] Face 'G' mirror image of face 'E' [1] Face 'H' mirror image of face 'F' [1] Six glue tabs added to appropriate faces [1] Glue tabs to same sizes as given tabs [1] Correct use of dot / dashed fold lines [1] Allow other development (net) configurations that will work	12	
B5(b)(i)	Offset / Lithography, flexography, digital printing, LED UV printing, gravure / roto gravure, laser, nanographic [1]	1	Accept any other valid response Do not allow: screen printing, large format, 3d, sublimation, letterpress, transfer, inkjet
B5(b)(ii)	Die cutting [1]	1	Do not allow: box cutter, laser cutter
B5(b)(iii)	Any method shown [1] Method holds lid in place suitably without use of adhesives – use of tabs / flaps [1] High quality communication – clear sketching of response [1]	3
