Paper 1 Short Answers

October/November 2025

1 hour

Candidates answer on the Question Paper.

Additional materials: Calculator

READ THESE INSTRUCTIONS FIRST

Write your centre number, candidate number and name in the spaces provided.

Write your answers in dark blue or black pen.

You may use an HB pencil for any diagrams, graphs or rough working.

Do **not** use staples, paper clips, glue or correction fluid.

Do **not** write on the bar code.

Answer **all** questions.

You may lose marks if you do not show your working or if you do not use appropriate units.

The number of marks is given in brackets [] at the end of each question or part question.

The total number of marks is 40.

For Examiner's Use

--

This document consists of **7** printed pages and **1** blank page.

- 1 The levels of classification of organisms are listed in hierarchical order but some are missing.

Complete the list.

kingdom,, class,, family, genus, species [1]

- 2 Insects and arachnids are arthropods.

State **two** features that are common to both arthropods.

1

2 [2]

- 3 Teeth help in mechanical digestion of food in the mouth.

Complete Table 3.1 by writing the type of tooth, feature and functions of the teeth.

Table 3.1

tooth type	feature	function
.....	chisel shape	
molar		

[2]

- 4 Fig. 4.1 shows an external view of a human heart.

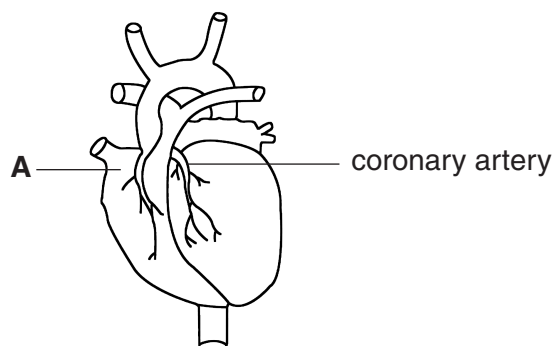

Fig. 4.1

- (a) Name **one** possible cause of a blockage of the coronary artery.

..... [1]

(b) Name the part labelled **A** in Fig. 4.1.

..... [1]

5 Identify the **two** products of photosynthesis using only their symbols.

1

2 [2]

6 Smoking can cause a condition called emphysema which reduces the movement of oxygen into the blood.

diffusion	smaller	thicker
larger	osmosis	

Use appropriate words from the box to complete the following statement about emphysema.

The alveoli in a lung with emphysema have a surface area than the

alveoli in a healthy lung. The surface area of the alveoli determines how much oxygen

moves into the blood by the process of [2]

7 Fig. 7.1 shows a seedling that had been growing in the box for 5 days.

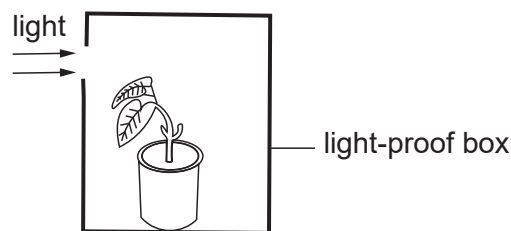

Fig. 7.1

State the response shown by the seedling.

..... [1]

8 In an ecosystem, a single cow feeds on a lot of grass while two cattle egrets (white birds) perch on the cow's back and eat ten ticks, small arthropods that are feeding on the cow's blood.

(a) Define the term *ecosystem*.

..... [1]

(b) Construct a food chain to show how energy moves in this ecosystem.

.....
 [2]

9 The left-hand boxes contain words associated with the body's defences against pathogens.

For each, draw a straight line to connect it to the box on the right-hand side that contains a description of how that defence may be achieved.

body's defences against pathogens	how the defence may be achieved
active immunity	by producing lymphocytes
passive immunity	by producing mucus
lymphatic system	by vaccination
phagocytosis	by antibodies from another person
	by ingestion and digestion of bacteria

[2]

10 Fig. 10.1 shows diagrams of cross-sections of an artery and a vein.

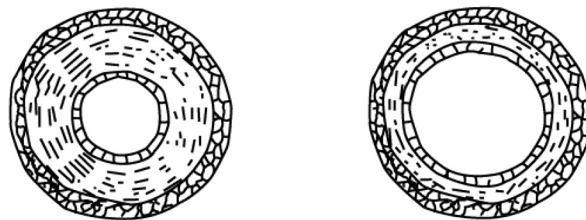

Fig. 10.1

Describe **one** visible structural difference between the artery and the vein in Fig. 10.1.

.....
 [1]

- 11 Guavas contain a lot of vitamin C.

Name the reagent used to test food for vitamin C and describe how it shows the presence of vitamin C.

reagent

presence of vitamin C

[2]

- 12 State **one** function of the medulla in the brain.

..... [1]

- 13 Fig. 13.1 shows how some organs regulate the levels of glucose in the blood as it flows through them

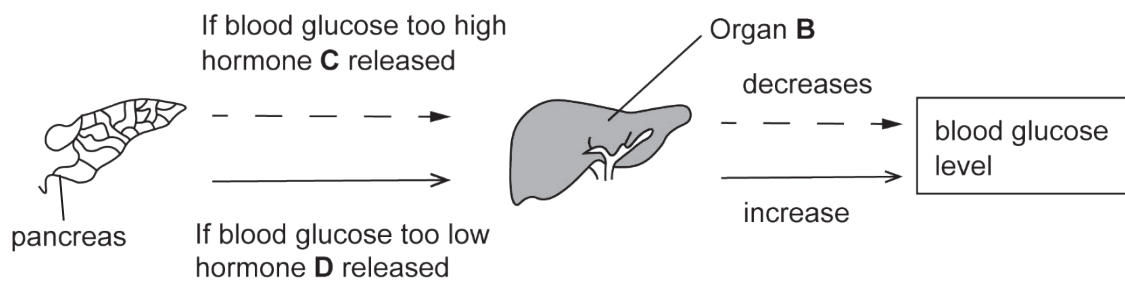

Fig. 13.1

- (a) Name organ **B** in Fig. 13.1.

..... [1]

- (b) Name the disorder caused when the pancreas fails to release the correct amounts of hormone **C**.

..... [1]

- 14 List **two** different organs where meiosis occurs in humans.

.....

..... [2]

- 15 State **two** reasons why bacteria are good organisms to use in genetic engineering.

1

2

[2]

- 16 (a) Define the term chromosome.

..... [1]

- (b) Fill in the boxes in Fig 16.1 to show how the four bases in DNA form pairs.

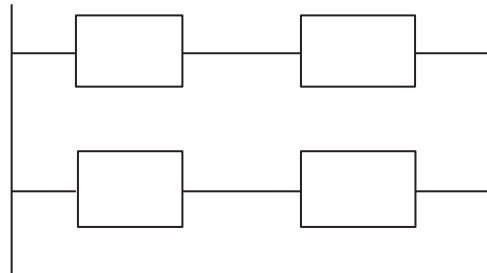

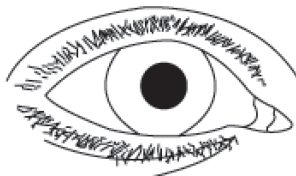

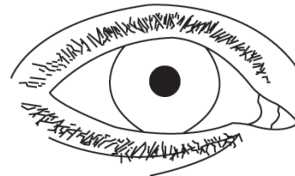

Fig. 16.1

[2]

- 17 In Fig. 17.1, **E** shows the eye of a student when in a dark room. Fig. 17.1 **F** shows the same eye after the student had moved into a brightly lit room.

E

F

Fig. 17.1

Explain how the change in the size of the pupil was brought about when the student entered the brightly lit room.

.....
 [2]

- 18 Fig. 18.1 shows how pollination might take place in two flowers of the same species.

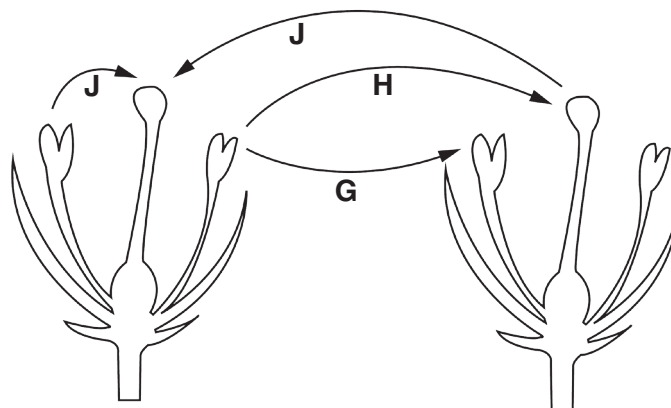

Fig. 18.1

(a) State the label of the arrow representing cross pollination.

..... [1]

(b) Suggest the agent of pollination of the flower in Fig. 18.1.

..... [1]

19 State **two** effects on the human body of long term alcohol abuse.

1

2 [2]

20 HIV is detected by blood tests.

(a) State **one** safety precaution that should be taken when handling blood samples for testing.

..... [1]

(b) Describe **one** method used to prevent the spread of HIV.

..... [1]

21 Fig. 21.1 shows a developing fetus in the uterus.

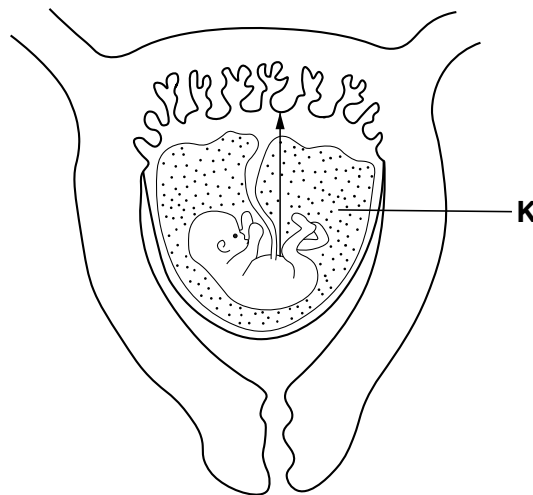

Fig. 21.1

(a) State the function of the fluid labelled **K** in Fig. 21.1.

..... [1]

(b) Name **one** substance that moves in the direction shown by the arrow in Fig. 21.1.

..... [1]
